

We Make Your RFID Migration Effortless!

If you're looking for your first RFID-based system or looking to upgrade from an existing one, the evaluation, selection and implementation process is a strategic decision for your organization. There are challenges associated with migrating to the RFID Technology. Our valued customers have expressed their desires for the following:

- Minimum staff training.
- Minimum operational disruption.
- Keep existing processes and procedures.
- Maintain existing ERP, WMS or other legacy applications.
- Quick integration with their ERP, WMS and POS applications.
- Minimize investments in IT infrastructure.
- Quick Implementation time.
- Low cost.
- Quick ROI.

These are viable and logical requests. We clearly understand these difficulties and the hesitation with changing your existing system. Upgrading your systems can be a costly proposition. Creating new business processes and training staff to adhere to those procedures can be a daunting task.

We feel your pain! After all, RFID's objective is to help you reduce costs and complexity while achieving increased accuracy and operational velocity. It should never be a burden to your organization.

"We make RFID simple & affordable"

This motto has been at the forefront of everything we do here at DominateRFID. Our exclusive RFID focus and extensive experience has led us to continuously strive, making our systems simple to use and affordable. Our products are field-tested and have proven to be the most robust, feature-rich, flexible and easy to use systems

Since one size does not fit all, we have developed two separate categories of products designed to meet large enterprise organizations and SME's ever-changing challenges. Our products provide a complete end-to-end solution, starting with your vendors and ending with your POS or shipping dock.

Apply plug & play RFID technology at absolutely no risk

In response to your requests, we have created the only RFID system on the market that eliminates the hassles and complexities involved with RFID implementation. Our system offers you the most comprehensive solution with the lowest total cost of ownership. To make it even easier, we have created bundled solutions at fixed prices to remove any unexpected "surprises".

Our innovative plug & play solutions are considered to be the tipping point in affordability and simplifying implementation of RFID. With our bundled solutions, you receive a fully-functional RFID tracking system right out of the box!

- Bundled RFID system including all hardware, software and RFID Tags.
- Low cost fixed prices.
- Plug & Play system.
- Cloud-based with no IT investment.
- For SME, the Implementation and training is done within 2 days. This includes integration as well.
- For large enterprise organizations, the Implementation is usually accomplished in less than 30 days (for a multi-store operation).
- Money-back Guarantee.

We are so confident of our solutions that we offer a money-back guarantee*. How many RFID companies do you know that can offer this?!

You are going to love it. We promise.
